Kazakhstan

Hard & Soft Skills

Hard skills

- Project Planning & Coordination
- CAPEX & Budget Control
- Engineering Studies (FEED / pre-FEED)
- Mechanical Systems Analysis
- Cost Optimization & Benchmarking
- Digital Oilfield Systems (PI System / SCADA)
- Power BI (Advanced)
- KPI Design & Executive Dashboards
- Data Analysis & Reporting Automation

Soft skills

- Stakeholder Management
- Cross-functional Collaboration
- Analytical Thinking
- Problem Solving
- Communication
- Leadership
- Time Management

Languages

- English (C2)
- Russian (Native)
- Kazakh (Native)
- Korean (B1)

Key Projects

- NCOC Executive KPI Platform
- Kashagan Budget Control Dashboard
- KPO SCADA-PI Integration Project
- Offshore Cargo Transportation Study
- Budget Benchmarking & Cost Optimization Projects

About Me

Experienced **multidisciplinary engineer** with expertise in **oil & gas project engineering**, mechanical systems, and data analytics (Power BI).

Experienced in supporting major upstream projects across **NCOC, KPO, TCO, and KazMunayGas**, including offshore and onshore developments.

Strong background in:

- **project planning** and execution (FEED / pre-FEED support)
- CAPEX and cost control
- **mechanical and infrastructure engineering analysis**
- **KPI systems** and executive reporting dashboards
- **Power BI** development and data-driven decision-making

Proven ability to integrate engineering, operations, and data analytics to improve efficiency, transparency, and **management decision speed** in complex oil & gas environments.

Experience

KazMunaiGas Engineering

Senior Project Engineer – Digital Oilfield & Development Projects 2022 - NOW

- Secured **\$400K** in new service contracts by designing executive-level digital reporting solutions for **KazMunayGas** and field operators, strengthening strategic partnerships and expanding commercial engagement across assets.
- Led and contributed to **10+ large-scale** cross-functional projects with **NCOC, KPO, TCO and Dunga field**, enhancing production data transparency, executive performance visibility and engineering workflow efficiency.
- Designed and implemented a unified executive **KPI dashboard for NCOC**, consolidating fragmented reporting into a centralized Power BI platform, reducing manual data preparation by **50+ hours annually** and accelerating reporting cycle and management decision-making.
- Combined **engineering expertise with data analytics** to deliver actionable insights and support strategic decision-making in oil & gas development projects.
- Supported **engineering and development studies** for offshore and onshore oil & gas assets including Kashagan field.
- Participated in **project planning, budgeting** and cost control activities supporting development and infrastructure projects.
- Participated in technical assessments associated with **fabrication, installation and commissioning planning**.
- Established and led a **cross-functional digital working group**, scope development and option screening aligning production, finance and engineering teams to standardize reporting governance, expand monitoring coverage to 100% of key assets and strengthen data-driven operational decision-making across digital oilfield initiatives.

ALSTOM

2021 - 2022

Production manager

- Streamlined production workflows and cost tracking processes, improving manufacturing efficiency **by 5-7% and reducing reporting** and coordination delays within production cycles.

Samsung Electronics Korea

2018 - 2019

Data Analytics Engineer

- Supported manufacturing process improvement **initiatives through data analysis and operational performance assessments**.
- Contributing to technical and business decision-making processes.

KT Telecom Korea

2017- 2018

Mechanical Engineer

- Improved mechanical system maintenance planning and technical coordination, contributing to **~10% reduction** in unplanned downtime and more reliable infrastructure performance.

Education

Bachelor of Mechanical Engineering

2016 - 2020

Pusan National University

Graduated from Pusan National University in **South Korea** with a Bachelor's degree in Mechanical Engineering. Gained strong foundations in problem-solving, data interpretation, and technical systems optimization.

Masters of Engineering & Project Management

2020 - 2022

Nazarbayev University

Master of Engineering Management with a focus on **Project Management, Engineering Economics, Risk Management, data analytics** and financial modeling. Experience in BI analysis, data consolidation and process optimization. Developed strategic solutions for large projects.
